

TOASTER

with countdown display

Crispy hot toast, perfectly browned

ROMMELSBACHER

This high-quality toaster from the *Sunny* breakfast series is a highlight for every kitchen. With its timeless linear design, it fits harmoniously into any kitchen. It makes planning for breakfast very easy, because the countdown display shows you at any time how long it will take for the two crispy hot slices of toast to pop out of the extra-wide slots with the desired browning. Its eye-catching and large LED display with Touch Control sensors makes operation extremely easy. The toaster performs its tasks to perfection: thanks to the intelligent control of toasting time, the toasting comes out perfectly every time and the browning intensity can be selected from 9 levels according to personal preference. The bread slices from small to XL are automatically centred so that each side is perfectly toasted. The toasting process can be interrupted by pressing the pause button to check the toasting progress. A defrosting stage for frozen bread slices and a practical reheating function if you want to reheat toast, plus a removable bun tray are also included in the extensive range of functions of this practical breakfast helper. Safety is also taken seriously. The toasting process can be stopped prematurely via a stop button and the overheating protection ensures a safe feeling. And afterwards? The crumb tray makes cleaning very easy. And when the power cord disappears into the cord storage, the toaster can be conveniently stored away until its next use. The TO 850 is part of the attractive *Sunny* breakfast series, which also includes a filter coffee machine and a turbo-fast water kettle in addition to this top-class toaster.

Breakfast series: water kettle,
filter coffee machine, toaster

Technical data:

Type: TO 850

- 220-240 V ~ 800 W • stainless steel/black
