

21-watt solar-powered portable battery charger

SKU: TESOLARCHG21W

Charge up to 2 devices simultaneously in 1 hour using exclusively solar energy

Ideal for all your outdoor activities - recharge using solar energy

This **portable solar charger** is just the accessory you've been looking for to recharge your favourite devices while enjoying **outdoor activities**, when you don't have a powerbank or electricity-based power source to hand. It is suitable for hiking, biking, camping, boat trips, or a relaxing afternoon in the park or on the beach.

Charge two devices at the same time safely and quickly

The **two USB-A ports** deliver power at **10.5 watts** each and can charge **smartphones, tablets, speakers, TWS headsets, rechargeable LED lamps, consoles, and e-readers**. They are compatible with many brands such as Apple, Samsung, Huawei, Xiaomi, and Oppo. Connect them via your own compatible cable to charge up to two devices at the same time. If you're in the mountains and your GPS smartwatch is out of power, don't worry: you don't need to plug it into a power outlet, and can simply **hold this charger in the sunlight** to charge your watch to **100% in 1 hour** (charging times are approximate and depend on the battery of the device being charged). The **Intelligent Charge** technology also automatically detects the maximum power that can be absorbed by the device and adjusts the power accordingly. This prevents **overheating and short-circuiting**. Green energy for all your accessories.

The practical pocket and included carabiners ensure practicality in all settings

The **foldable pocket** next to the solar panels offers the possibility of storing a phone while charging. In this way, **you can use the charger even while on the move**, and don't need to worry about losing the device you are charging. The **carabiners included** can also be attached to the holes in the corners of the charger: **you can attach it to your backpack** to absorb solar energy and, at the same time, power a device - even while walking or cycling.

Compact and foldable

The solar charger can be folded in on itself thanks to a velcro fastening. Thanks to its compact size (16.5 x 29 x 2 centimetres), you can stow it **in a backpack or duffle bag** quickly and easily, whenever you need it.

Key features:

- recharge your devices using exclusively solar energy
- charge up to 2 devices at the same time
- two USB-A ports that each deliver 10.5W of power
- Intelligent Charge technology that regulates the energy delivered depending on the device being charged: this prevents overheating and short-circuiting
- Fast Charge: charge a device in one hour (charging times are approximate and depend on the battery of the device being charged)
- accessories and cables can be stored in the pocket with velcro fastening
- it is possible to attach the charger to a backpack using the included carabiners
- dimensions when open: 68 x 29 x 1 cm
- foldable: the charger can be easily stored in a backpack
- dimensions when closed: 16.5 x 29 x 2 cm
- material: monocrystalline silicone + waterproof fabric

Includes:

- 1 portable solar charger
- 2 carabiners
- 1 instruction manual

21-watt solar-powered portable battery charger
SKU: TESOLARCHG21W

Technical data

Output power: 21W
Input: Solar panel: 3 x 7W (21W)
Output: 5 VDC 2.1A
Connector: 2 x USB
Plug type: n/a
Technology: Intelligent Charge
USB Output: 5V - 2.1A
USB 2 Output: 5V - 2.1A
Charging type: Fast
Input voltage: 5VDC / 2.1A
Included accessories: 2 carabiners, User manual
Color: black
EAN: 8018417436802
SKU: TESOLARCHG21W
Maximum output power: 21 WATT
