PowerBoost

The function heats the hob fast and shortens waiting time.

Induction hobs

Induction hobs heat up twice as fast as gas cookers, which makes them comparatively more economical and safe. An induction hob only heats the bottom of the pan while the remaining hob surface stays cool and always safe to touch. Temperature is adjusted instantly, by a simple touch, limiting the danger of boiling over. With such a hob melted chocolate, sophisticated sauces and other temperature-sensitive masterpieces become just a simple task.

ChildLock

The function locks the touch surface, making it safe even if the hob is not in use.

Timer

The feature turns the hob off after a pre-set time.
